

## TEXT EQUIVALENCING ENGINE

### ABSTRACT OF THE DISCLOSURE

[0044] A system, method, and computer program product perform text equivalencing.

The text equivalencing is performed by modifying a string of characters by applying a set of  
5 heuristics, comparing the modified strings of characters to known strings of characters. If a  
match is found, the text equivalencing engine performs database update and exits. If no match is  
found, sub-strings are formed by grouping together frequently occurring sets of characters. An  
information retrieval technique is performed on the sub-strings to determine equivalent text.
